

BREATHE & BLOOM

Anthurium

I'll improve air
quality & provide
exotic blooms
ALL YEAR ROUND.

I like plenty of
indirect light &
room temperature
not below 15°C.
Mist me regularly
to create high
humidity.

Water me regularly
to keep the soil
moist during spring
& summer. Water
less in winter. Feed
me every 2-3 weeks.

Repot me every 2
years when the roots
start to grow through
the drainage holes.
Use a loam free
potting mix.
